Bacteriol. 184:4601-4611(2002).

Bacteriol. 184:27es the NADP-dependent rearrangement and of 1-deoxy-D-xylulose-9-phosphate (DXP) to 2-C-methyl-D-4-phosphate (MEP) (By similarity).

- CATALYTIC ACTIVITY: 2-C-methyl-D-erythritol 4-phosphate 1-deoxy-D-xylulose 5-phosphate + NADPH.

- PATHWAY: Nonmevalonate terpenoid biosynthesis pathway; simple statement of the statement
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           EQUENCE FROM N.A.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                 SPTREMBL 23:*
